

1. Cut out a rectangular piece of card (Optional: Decorate it with felt tips!)
2. Fold it in half.
3. Make cuts like pictured. Cut lines and curves until they almost reach the fold.
4. Optional, decorate with stickers.
5. Open it up and fold the strips to the front or back in an alternating fashion. (This will help the sculpture to balance.) So on the left side you would fold the strips (starting from the top) front, back, front, back, and front. And on the right side you would fold the strips (starting from the top) back, front, back, front, and back.

6. Try some different variations.
